

TECHNICAL INFORMATION SHEET

RubberGard™ Max FR (Fire Retardant) EPDM Membrane

Item Description

45-mil 10' X 100'
60-mil 10' X 100'

Item Number

W57SF41010
W57SF61010

Product Information

Description:

Firestone RubberGard MAX FR EPDM is a cured single-ply roofing membrane that features 9 x 9, 1,000 denier polyester weft inserted scrim reinforcement for increased puncture resistance.

Preparation of Substrate:

1. Substrates must be clean, dry, smooth, and free of sharp edges, fins, loose or foreign materials, oil, grease, and other materials that may damage the membrane.
2. All roughened surfaces that can damage the membrane shall be repaired as specified to offer a smooth substrate.
3. All surface voids greater than ¼" (6.3 mm) wide shall be properly filled with an acceptable fill material.

Method of Application:

RubberGard MAX FR EPDM Membrane must be installed in accordance with current RubberGard specifications, details and workmanship requirements.

Storage:

- Store away from sources of punctures and physical damage.
- Assure that structural decking will support the loads incurred by material when stored on rooftop. The deck load limitations should be specified by the project designer.
- Store away from ignition sources as membrane will burn when exposed to open flame.

Precautions:

- Take care when moving, transporting, handling, etc. to avoid sources of punctures and physical damage.
- Assure that structural decking will support the loads incurred by material when stored on rooftop. The deck load limitations should be specified by the project designer.
- Isolate waste products, such as petroleum products, greases, oils (mineral and vegetable) and animal fats from the RubberGard membrane.
- Refer to Safety Data Sheets (SDS) for safety information.

LEED® Information:

Post Consumer Recycled Content: 0%
Post Industrial Recycled Content: 0%
Manufacturing Location: Prescott, AR

*NOTE: LEED® is a registered trademark of the U.S. Green Building Council.

Packaging:

.045" MAX FR : 10' (3 m) x 100' (30.5 m) - 0.32 lb/sf (1.5 kg/m²)
.060" MAX FR: 10' (3 m) x 100' (30.5 m) - 0.42 lb/sf (2.1 kg/m²)

NOTE: Available sizes vary by product. Contact Firestone Customer Service for availability and packaging information.
